

The School Garden

The school garden produces around 1,113 vegetables each year and donates around 415 vegetables to the local shelter. How many vegetables do the students at school enjoy?

Kourtney needs help counting out her sweet corn seeds. Similar to field corn, sweet corn needs the right amount of space to grow. She needs three seeds per square each six inches apart, because Mr. Chadwick planted the first plot. How many more seeds does she need?

Kourtney watered 12 sweet corn plants at the beginning of the school day on Tuesday. In the afternoon, she watered some more. If she watered 27 plants in all, how many plants did she water that afternoon?
