

Directions:

1. Each student gets a copy of the corn plant and corn seed pictures. They can paste these pictures into their notebook.
2. Each student gets a copy of the seventeen name cards.
3. They can cut these out, fold them in half with the name on the outside and then paste the white backside to the notebook next to the line that identifies the structure.
4. Students can then flip up the name card and write its function on the inside.
